

EXI SHOW

Programme

Issue 1 Feb 2025

Welcome

EXI is an existential art exhibition based on the themes, philosophies and writings on existentialism and the meaning of human existence, allowing the viewer and artist alike to consider the meaning of their own existence.

WHAT IS OUR PURPOSE?

The meaning of life isn't some distant truth waiting to be discovered—it's woven into the fabric of every day life.

We search for meaning in places like success or fame, a way to make a small mark on the history of civilisation. For most life often becomes a repetitive loop of nothingness fulfilling a purposeless existence in a purposeful way. In the end, the meaning isn't something to find, it's something to experience, to feel in the rush of life and the calm of stillness.

Is it something that becomes clearer when you stop searching so hard, and simply start living?

EXISTENTIALISM AND ART

Existentialism in art is the exploration of life's raw truths—the struggles, the isolation or the unbounded joy in being, the search for meaning in a universe that often seems indifferent to our existence. It's an artistic rejection of easy answers and a confrontation with the messy, chaotic nature of being human.

LIFE IS LIKE A FILM

In existentialist art, the subject is often a person grappling with their own freedom, their own responsibility, and the uncertainty of existence. The works tend to focus on individual experience,

placing the viewer face-to-face with themes of anxiety, absurdity, and the inevitability of death. Think of the dark, haunting figures in Edvard Munch's *The Scream*, the existential solitude of Franz Kafka's stories, or the abstract dissonance of Jean-Paul Sartre's philosophy brought to life in your very own modern cinema.

What makes existentialism in art so powerful is its refusal to offer easy comfort or solutions. It forces us to reckon with the idea that meaning isn't handed to us, that we must create it ourselves, often from chaos or nothingness. It's not about finding clarity, but about embracing the ambiguity and coming to terms with it.

In essence, existentialism in art strips away illusions, leaving the viewer with the brutal beauty of existence—unpredictable, fleeting, and wholly ours to shape.

WHAT IS THE POINT THEN?

Art has the power to transcend boundaries, uniting people across cultures, ideologies, and experiences. It speaks a universal language that words often fail to convey, evoking emotions, fostering empathy, and sparking dialogue. Whether through music, painting, dance, or theater, art provides a shared space for connection, helping individuals see the humanity in one another despite their differences.

ABOUT THIS SHOW

Founded by London artist Evelyn J Marshall, EXI show was created to bring together artists who live on the edge of the many scenes that straddle the fringe art landscape and to find a home for the disenfranchised and optimistic alike.

To not be tied down to the rigid narrative or work sizing restrictions that has become the norm in the current landscape, as the theme is ultimately based on both the viewer and the artists interpretation of existence, it is hoped that somehow these boundaries can be removed to engage the public with artists who make larger or varied bodies of work.

No matter what, who or where you've been, you're welcome here.
